

SINK OR FLOAT?

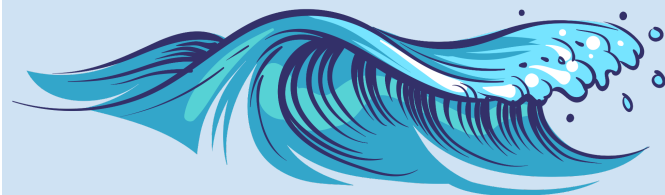

Why do things float?

Things float because of something called density. A more dense object like a rock will sink and a less dense object like a balloon will float.

Name of Object:	Float	Sink
 Crayon		
 Pencil		
 Coin		
 Popsicle Stick		
 Toy Car		
 Cotton Ball		
 Marshmallow		

Make a prediction!
What do you think will happen when you drop these objects in a bucket of water?
Try out some more objects at home and see if they float!
